# Testimonies

*“A program recommended for every youth...”*

*“Mr. & Mrs. Dasher have strategically designed a curriculum to meet the academic, emotional, and situation needs of students. Their understanding of the “common sense” needs of students have been an asset to our school and the academic growth of our students... Teachers are pleased to see increased comprehension in note taking skills, greater responsibility for learning, and an increase in personal confidence.” P. King, Principal, Urbita Elementary School, San Bernardino, CA*

Trends of family life indicate a decline; single parent households growing through divorce and non-committal; underlying societal influences of mind-sets and behaviors are contributing to purposelessness, disrespect, identity crisis, toxic emotions, mental/relational/ learning issues, overwhelming diagnoses of ADHD & Bipolar disorders, and substance abuse, violence/homicide/suicides; effecting the value/regard for life, family relationships, financial turmoil, teenage pregnancies/ abortion, sickness and disease. The cause: a lack of knowledge and want for what is true. Truth. Love. Grace. Youth/ families need to know and understanding their personal value and significance; purpose and potential. They also need to be inspired to manifest it. Lack of Truth principles and genuine Love severely impacts communities at every level. In collaboration with community businesses & members, TLRC is developing a generation of inspirational leaders, healing past generations and providing all the opportunity to acquire the principles, attitudes and skills that lead to success.

**Damian L., Age 13, Goodyear, AZ-**  
*before coming to TLRC’s Life Skills Program, “I was scared. I became successful in what I was doing. I learned not to be scared and I learned more about God. I feel much better and I am not scared and I am successful because I have confidence.”*

Damian came to learn that he doesn’t have to be afraid no matter what he faces in life... that God Who created Him, has a good plan and purpose for his life, and has provided/revealed the principles he needs for successful living. He’s now learning how to practically apply them; seeing results.

**Teacher's Quarterly Report and Testimony:**

*“Damian has shown tremendous growth this year in his subject areas. He is self-disciplined in the enhancement of his skills, committing to staying after school every night to improve his reading.” B. Minor*

Fun-filled, interactive, hands-on learning...developing skills for the real world.

*“You learn a lot and it’s something you can look forward to each week...” C. Clark, 9 years, Buckeye, AZ*

*“We are foster parents... Trinity’s Learning Resource Center’s program taught and reinforced self-discipline, respect, and self respect qualities that our daughter successfully incorporated into her everyday life. She had a successful school year and received really good grades. Additionally, she integrated into our family exceptionally well as the result of Trinity’s Life Skills Program.” Robert and Raquel Waghenefer, Waddell, AZ*

**“Growing Success...”**
